Independent Auditor's Report

To the Contractholders of
AIC Segregated Funds:

AIC Diversified Canada Segregated Fund
AIC Money Market Segregated Fund
(each individually, the "Fund")

Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2021 and 2020, and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2021 and 2020, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the Management Report of Fund Performance.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained the Management Report of Fund Performance prior to the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

(\$ in thousands)

1. THE FUNDS

ivari is the sole issuer of the variable annuity contract, which is invested in mutual funds ("underlying funds"). The assets of AIC Diversified Canada Segregated Fund and AIC Money Market Segregated Fund (individually, a "Fund", and collectively, the "Funds") are owned by ivari, but are segregated from other assets of ivari under the *Insurance Companies Act*. The Funds are not separate legal entities.

Manulife Investment Management Limited (the "Manager") is the manager of the Funds. Prior to September 25, 2009, AIC Limited was the manager of the underlying funds. The Manager provides certain administrative services to the Funds. Manulife Financial Corporation is the ultimate parent company of the Manager.

The address of the Funds' registered office is 200-5000 Yonge Street, Toronto, Ontario, M2N 7E9, Canada.

The financial statements of each of the Funds were authorized for issue by ivari on April 1, 2022.

The inception date of the Funds is January 18, 1999.

The Statements of Financial Position of the Funds are as at December 31, 2021 and 2020. The Statements of Comprehensive Income, Statements of Changes in Net Assets Attributable to Contractholders and Statements of Cash Flows are for the years ended December 31, 2021 and 2020. The Schedule of Investment Portfolio is as at December 31, 2021.

Investors have two purchase options for the Funds. They can be purchased with a 100% guarantee or a 75% guarantee. Each purchase option comes with a different expense ratio.

Abbreviations legend

The following is a list of abbreviations used in these financial statements:

Currency abbreviations

CAD - Canadian Dollar

Other abbreviations

FVTPL - Fair Value Through Profit or Loss

IAS - International Accounting Standard(s)

IASB - International Accounting Standards Board

IFRS - International Financial Reporting Standard(s)

MLI - The Manufacturers Life Insurance Company

NAV - Net Asset Value

NAVPU - Net Asset Value Per Unit

TSX - Toronto Stock Exchange

2. SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared in accordance with IFRS as issued by the IASB.

The significant accounting policies set out below have been consistently applied within these financial statements.

a) Critical accounting estimates and judgments

The preparation of the Funds' financial statements requires the Manager to make judgments, estimates and assumptions that affect the reported amounts recognized in the financial statements and disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in future periods. The following is a discussion of the most significant accounting judgments and estimates made in preparing the financial statements:

Estimates

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, if any, are discussed below. The Manager based the assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Manager. Such changes are reflected in the assumptions when they occur.

The Manager believes that the estimates used in preparing the financial statements are reasonable and prudent. Actual results could differ from these estimates and the difference could be material.

b) Financial instruments

Recognition and derecognition

All financial instruments are recognized at fair value upon initial recognition when a Fund becomes a party to the contractual requirements of the financial instruments.

A financial asset is derecognized when the right to receive cash flows from the asset has expired or the Funds have substantially transferred all risks and rewards of ownership. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expired.

Notes to financial statements for the years ended December 31, 2021 and 2020

(\$ in thousands)

Classification

In classifying and measuring financial instruments held by the Funds, the Manager is required to assess the Funds' business model, the manner in which all financial assets and financial liabilities are managed and performance evaluated as a group on a fair value basis and the contractual cash flow characteristics of these financial instruments. The Funds' portfolio of financial assets is managed and evaluated on a fair value basis. Consequently, the Funds classify and measure all investments and derivatives at FVTPL.

All other assets and liabilities are subsequently measured at amortized cost in accordance with IFRS 9, *Financial Instruments* ("IFRS 9").

The Funds' obligations for net assets attributable to contractholders are classified as financial liabilities in accordance with the requirements of IAS 32, *Financial Instruments: Presentation* ("IAS 32") and are presented at the redemption amount.

Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Investments in underlying funds are valued at their NAV calculated by the Manager in accordance with the constating documents of the underlying fund. If the NAV is unavailable, underlying funds are valued using the last published NAV or at the fair value as determined by the Manager utilizing observable market inputs, whichever is deemed to be the best representation of fair value of the underlying funds.

c) Investments in subsidiaries, associates and unconsolidated structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

Subsidiaries are all entities, including investments in other investment entities, over which the Funds have control. A Fund controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Manager has determined that the Funds are each an investment entity as defined by IFRS 10, *Consolidated Financial Statements* and as such, the Funds account for subsidiaries at fair value. Disclosures with respect to the Funds' investments in unconsolidated structured entities are included in Note 7, as applicable.

d) Cash

Cash represents cash at the bank and is carried at amortized cost, which approximates its fair value. Cash is held with the Funds' custodian, a Canadian financial institution.

e) Investment transactions

Investment transactions are recorded on a trade date basis. Realized gain or loss on sales of investments and change in unrealized appreciation (depreciation) in the value of investments are determined on an average cost basis.

f) Income recognition

Income from investments is recognized on an accrual basis.

Interest for distribution purposes shown in the Statements of Comprehensive Income includes interest on cash balances.

Distributions from the underlying funds can include dividends, interest for distribution purposes and capital gains, the proceeds of which are used to purchase additional units in the underlying funds. Distributions are recognized at the date of the distribution by the underlying funds and shown separately as distribution income from underlying funds in the Statements of Comprehensive Income.

g) Allocation of income and expenses, and realized and unrealized gains and losses

Management and administration fees directly attributable to a class are charged to each class. Income, realized gains and losses from investment transactions, change in unrealized appreciation (depreciation) and any fund-level expenses are allocated proportionately to each class based on the relative NAV of each class.

h) Foreign exchange translations

The Funds' functional and presentation currency is CAD.

i) NAV per unit

The NAVPU of each class of each Fund is computed by dividing the NAV of the class by the number of units outstanding of that class at the time. The NAVPU is determined at the close of business each day the TSX is open for business.

The NAV of each class of a Fund is computed by calculating the value of that class' proportionate share of the Fund's common assets less liabilities and less that class' specific liabilities.

Notes to financial statements for the years ended December 31, 2021 and 2020
(\$ in thousands)

j) **Increase (decrease) in net assets attributable to contractholders per unit**

Increase (decrease) in net assets attributable to contractholders per unit in the Statements of Comprehensive Income represents the increase (decrease) in net assets attributable to contractholders of each class for the year, divided by the weighted average number of units outstanding of that class during the year.

k) **Other financial assets and financial liabilities**

All other financial assets and financial liabilities (other than those classified as FVTPL) such as cash, interest, dividends and other receivables, receivable from investments sold, receivable from Manager, payable on investments purchased and accrued expenses and other liabilities are valued at cost or amortized cost.

l) **New IFRS standards issued but not yet effective**

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have significant impact on the Funds.

3. FINANCIAL INSTRUMENT RISKS

Coronavirus 19 (COVID-19) impact

Since the outbreak of COVID-19, emergency measures taken in response to the spread of COVID-19 have resulted in significant disruption to business operations globally, resulting in an economic slowdown. Global equity and capital markets have also experienced significant volatility and weakness. The governments have reacted with significant monetary and fiscal interventions, as well as vaccine rollout programs, designed to stabilize economic conditions. These developments are constantly evolving and the duration and impact of the COVID-19 pandemic is highly uncertain and cannot be predicted at this time but could have a material impact on the future performance of the Funds. In the face of the current environment of heightened uncertainty and market volatility, the Manager continues to closely monitor its impact on the Funds' risk exposures from the portfolio holdings.

Management of financial instrument risks

The Funds may be exposed to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate risk, currency risk, concentration risk and other market risk). The Funds' overall risk management program seeks to maximize the returns derived for the level of risk to which the Funds are exposed, and seeks to minimize potential adverse effects on the Funds' financial performances. The value of investments within the Funds' holdings can fluctuate on a daily basis as a result of changes in interest rates, economic and market conditions and company news related to specific securities within the Funds. The Funds' risk management practice includes the monitoring of compliance to investment policy and guidelines. The Manager manages the potential effects of these financial risks on the Funds' performances by employing and overseeing professional and experienced portfolio advisors that regularly monitor the Funds' positions, market events and diversify investment portfolios within the constraints of the investment guidelines.

The Manager maintains a risk management practice that includes monthly and quarterly monitoring of the returns-based risk profile of the Funds. The Manager also monitors compliance with investment restrictions to ensure that each Fund is being managed in accordance with its stated investment objectives, strategies and securities regulations.

Some Funds specialize in a particular industry, or in a single country or geographic region of the world. These Funds may therefore be more volatile than more broadly diversified Funds. The overall risk management program of such Funds seeks to minimize the potentially adverse effect of risk on each Fund's financial performance in a manner consistent with its investment objective.

To help to achieve consistent stable and robust returns over the long term, each Fund is diversified by asset class, region, and management style and strategies. Each portfolio is designed for a defined level of risk.

Financial instrument risk

a) **Credit risk**

Credit risk is the risk that the issuer of a debt security or counterparty to a financial instrument will fail to pay the interest or to repay the principal or discharge an obligation or commitment that it has entered into with the Fund. The carrying value of investments as presented in the Schedule of Investment Portfolio represents the maximum credit risk exposure as at December 31, 2021. This also applies to other assets, as they have short terms to settlement. The midpoint credit rating from Standard & Poor's has been used in the risk disclosures, where applicable.

Exposure to credit risk is not presented for Funds that primarily invest in securities with maturities less than one year or bank deposits since the risk is considered minimal.

Credit risk is presented on debt securities (excluding short-term investments) and derivative assets. The Funds may be exposed to indirect credit risk in the event that the underlying funds hold debt securities and/or derivative assets.

As at December 31, 2021 and 2020, the Funds are not directly exposed to significant credit risk.

b) **Interest rate risk**

Interest rate risk is presented on debt securities (excluding short-term investments). All short-term investments have a maturity of less than one year. The Funds are exposed to the risk that the fair value of interest-bearing financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. Other assets and liabilities are either short-term in nature or non-interest-bearing.

Notes to financial statements for the years ended December 31, 2021 and 2020
(\$ in thousands)

Generally, the fair value of fixed income securities will vary inversely in relation to a change in interest rates. As interest rates rise, the fair value of fixed income securities falls and vice versa. The magnitude of the fall and rise will generally be greater for long-term fixed income securities than for short-term fixed income securities.

Exposure to interest rate risk is not presented for Funds that primarily invest in securities with maturities less than one year or bank deposits since the risk is considered minimal.

The Funds may be exposed to indirect interest rate risk in the event that the underlying funds hold debt securities.

As at December 31, 2021 and 2020, the Funds are not directly exposed to significant interest rate risk.

c) Currency risk

Currency risk arises from financial instruments that are denominated in a currency other than the functional currency of each Fund. The Funds are exposed to the risk that the fair value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Schedule of Investment Portfolio identifies all fixed income securities denominated in foreign currencies. Fixed income securities are presumed to be denominated in the Funds' presentation currency unless otherwise noted. Equities trading in foreign markets are also exposed to currency risk as the price in local terms on the foreign stock exchange is converted to the functional currency to determine fair value.

The foreign currency exposure amounts are based on the fair value of the Funds' holdings and the underlying notional amounts of any derivative contracts. The investments include both monetary and non-monetary instruments.

The Funds may be exposed to indirect currency risk in the event the underlying funds invest in foreign currency denominated instruments.

As at December 31, 2021 and 2020, the Funds are not directly exposed to significant currency risk.

d) Concentration risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The Funds are not exposed to any direct concentration risk but are exposed to indirect concentration risk of the underlying funds as their entire portfolios are invested in underlying funds.

e) Other market risk

For a Fund investing in securities, the NAVPU of the Fund is directly related to the fair value of those securities, which increases or decreases depending on the financial performance of the security issuers and general economic, political, tax and market conditions.

All securities present a risk of loss of capital. The Manager manages this risk through a careful selection of securities and other financial instruments within the parameters of the Funds' investment strategies. Except for options written and futures contracts held short (if any), the maximum risk resulting from financial instruments is equivalent to their fair values. Possible losses from options written and futures contracts held short can be unlimited. The Funds' equity, debt and derivative instruments are susceptible to market price risk arising from uncertainties about future prices of the instruments.

Exposure to other market risk is not presented for AIC Money Market Segregated Fund since it invests in an underlying fund which primarily holds securities with maturities less than one year and the risk is considered minimal.

The impact on net assets attributable to contractholders of the Funds due to a 5% change in NAV of the Funds, with all other variables held constant, would be approximately \$254 as at December 31, 2021 (\$239 as at December 31, 2020) for AIC Diversified Canada Segregated Fund. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

f) Liquidity risk

Liquidity risk is the risk that a Fund may not be able to settle or meet its obligations associated with financial liabilities on time. Each Fund is exposed to daily cash redemptions of units. The Funds are primarily invested in securities that are traded in active markets and can be readily disposed of. All other liabilities of the Funds, other than derivatives, mature in six months or less. In addition, the Funds try to maintain sufficient cash positions to meet liquidity requirements. The Funds also have the ability to borrow up to 5% of their net assets attributable to contractholders for the purpose of funding redemptions.

g) Fair value measurement

The Funds classify each financial instrument into one of three fair value levels within the fair value hierarchy. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are:

Level 1 – for unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – for inputs, other than quoted prices included in Level 1, that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – for inputs that are based on unobservable market data.

If inputs of different levels are used to measure an asset's or liability's fair value, the classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement.

Notes to financial statements for the years ended December 31, 2021 and 2020
(\$ in thousands)

All fair value measurements are recurring. For financial instruments whose fair values approximate their carrying values, given their short term nature, the carrying values of financial instruments measured at amortized cost approximate their fair values. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3.

The models used to determine fair value measurements included in the financial statements of the Funds including Level 3 measurements, if any, are validated and periodically reviewed by experienced personnel of the Manager, independent of the party that created them. The Manager considers and reviews the appropriateness of the valuation models, the valuation results, as well as any adjustments to the prices or estimates used by these models. At each financial reporting date, the Manager reviews and approves all Level 3 fair value measurements.

Underlying funds

The Funds' investments in underlying funds are classified as Level 1 when they are redeemable on a daily basis. They are classified as Level 2 when they are not redeemable on a daily basis.

Fair value hierarchy

All of the Funds' investments are classified as Level 1 as of December 31, 2021 and 2020.

Transfers between levels

There were no transfers between levels during the years ended December 31, 2021 and 2020.

4. UNITS OF THE FUNDS

Units issued and outstanding represent the capital of each Fund. Each Fund is authorized to issue an unlimited number of units with no par value in each class, which are redeemable at the option of the contractholder at their current NAVPU.

Each Fund has a contractual obligation to repurchase or redeem its units for cash or other financial assets and as such, the outstanding units are classified as a financial liability. The Funds have no restrictions or specific capital requirements other than minimum subscription requirements. Changes in each Fund's units during the periods are disclosed in the Statements of Changes in Net Assets Attributable to Contractholders. The Funds endeavour to invest the proceeds received from subscriptions in appropriate investments in conjunction with their investment objectives while remaining in compliance with regulatory requirements. The Funds maintain sufficient liquidity to meet redemptions, such liquidity being augmented by short-term borrowings or disposal of investments where necessary.

The Funds issued two classes of units which are equally subordinate, but are not identical. Thus, the units do not qualify for classification as equity and are presented as financial liabilities in accordance with the requirements of IAS 32.

5. TAXATION

The Funds are deemed to be trusts under the provisions of the *Income Tax Act* (Canada) (the "Act"). The Funds' income and net capital gains and losses are deemed to be allocated to the contractholders so that the Funds will not be liable for tax under Part I of the Act. Accordingly, the Funds do not record income tax provisions. Any tax benefit of non-capital loss carry-forwards, where applicable, has not been reflected as a deferred income tax asset in the Statements of Financial Position.

Non-capital losses may be used to reduce future taxable amounts, and can be carried forward for up to twenty years.

Notes to financial statements for the years ended December 31, 2021 and 2020
(\$ in thousands)

The following table summarizes non-capital loss carry-forwards, if any.

As at December 31,	2021		2020	
	Non-capital losses (\$)	Expiry year	Non-capital losses (\$)	Expiry year
AIC Diversified Canada Segregated Fund	-	2039	48	2039
	47	2040	120	2040

6. RELATED PARTY TRANSACTIONS

The Funds' investments in underlying funds managed by the Manager, which is a subsidiary of MLI, are related party investments. All investment transactions relating to these underlying funds are at the NAVPU of each underlying fund. The Funds receive distribution income from these underlying funds. Details of such investments are included in the Schedule of Investment Portfolio.

Management fees and operating expenses

ivari charges the Funds an annual management fee. The Manager charges an annual management fee to the underlying funds for the provision of its services pursuant to the management agreement.

The daily management fee applicable to the Funds and payable to ivari is calculated on each valuation date and is equal to the product of the NAV of the Funds on such date and the number of days elapsed since the last valuation date, multiplied by ivari's daily management fee applicable to the Funds.

In addition to the management fee payable, the Funds and underlying funds are responsible for all costs relating to their operations, including, but not limited to, legal, audit, accounting, custodial, safekeeping fees, taxes (if any), interest, operating and administrative costs, costs of financial and other reports and information folders required to comply with laws and regulatory guidelines regulating the issuance or sale of variable annuity contracts.

The Manager, at its discretion, has waived or absorbed a portion of the operating expenses otherwise payable by a Fund. These waivers may be terminated at any time by the Manager.

7. INVESTMENTS IN SUBSIDIARIES, ASSOCIATES AND UNCONSOLIDATED STRUCTURED ENTITIES

The Funds consider all of their investments in underlying funds to be investments in unconsolidated structured entities.

The purpose of the underlying funds is to invest funds solely for returns from capital appreciation, investment income, or both.

The underlying funds finance their operations by issuing securities which are puttable at the holder's option and entitle the holder to a proportional stake in the respective underlying fund's net assets. The Funds hold securities in each of their underlying funds. The carrying amount of the Funds' interests in the underlying fund is recognized in investments, at fair value in the Statements of Financial Position. The carrying amount of the Funds' interests in the underlying fund is equal to the maximum exposure to loss. The change in fair value of each underlying fund is included in change in unrealized appreciation (depreciation) in the value of investments in the Statements of Comprehensive Income.

The Funds' investments in underlying funds are subject to the terms and conditions of the respective underlying funds' offering documents and are susceptible to market price risk arising from uncertainties about future values of those underlying funds.

The Funds have the right to request redemption of its investment in an underlying fund on a daily basis. Once the Funds have disposed of securities of an underlying fund, the Funds cease to be exposed to any risk from that underlying fund.

All investments in underlying funds that are unconsolidated structured entities are disclosed in the following table:

As at December 31, (\$)	2021		2020	
	Net assets of underlying fund	Fair value of investment in underlying fund	Net assets of underlying fund	Fair value of investment in underlying fund
Underlying fund name

8. SUBSEQUENT EVENT

Subsequent to December 31, 2021, the escalating conflict between Ukraine and the Russian Federation has resulted in significant volatility and uncertainty in financial markets. In February 2022, a number of countries, including Canada, imposed new sanctions against Russian government entities, state-owned enterprises or sanctioned entities and individuals linked to Russia anywhere in the world. As a result of these uncertainties and actions, there may be negative impacts on the Funds' net asset values as presented in these statements and impacts on subsequent income. The effect of this conflict remains a rapidly evolving issue, leading to a high degree of volatility and uncertainty that could impact worldwide financial markets while the conflict continues.

Net Asset Value per unit ⁽¹⁾ (\$)	10.44	8.90	7.55	6.74	7.40

⁽¹⁾ This information is provided as at December 31 of the year shown, unless otherwise indicated.

⁽²⁾ The management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net assets during the period. It is calculated by dividing total expenses, fees and charges excluding commissions, transaction costs and income taxes by the average net asset value of the segregated fund for the financial period, then multiplying the result by 100.

⁽³⁾ The Fund's portfolio turnover rate indicates how actively the portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in the period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a portfolio.
